Summary

Third-year Computer Science student with **1+ year of experience** in **Android Development** through internships and personal projects, building apps with backend integrations. Solved **100+ problems** on **LeetCode** and **CodeChef**, demonstrating strong algorithmic and problem-solving skills.

Experience

- **Full Stack Android Developer [Internship] - Bid.AI** *Oct 2025 – Present*
 - Architected **multi-format file export** with **Puppeteer**, **EJS** templating, **ExcelJS**, and **csv-writer** for structured data processing.
 - Built an **secure in-app bill sharing flow** integrating backend services and external APIs, focusing on reliable and safe data transmission.
 - Implemented **Razorpay-based subscription system** ensuring **secure payment processing**, backend verification, and integrity of transactions.
 - Integrated **real-time analytical systems** using **Jetpack Compose** for structured data visualization.
- **App Development Mentor [Freelance] - Tutedude** *Oct 2025 – Present*
 - Mentoring students in building applications using **Kotlin**, focusing on **system design, architecture, and debugging**.
 - Conducting sessions on **MVVM architecture**, state management, and API integration.
 - Guided students in building scalable and efficient systems using modern development practices.
- **Full Stack Mobile Developer [Freelance] - Dealora** *Dec 2025 – Feb 2026*
 - Developed an **end-to-end coupon and notification system** using **Kotlin**, **Jetpack Compose**, **Node.js**, and **Express.js**, enabling seamless interaction across mobile, backend, and web platforms.
 - Implemented **push notification architecture** with **Firebase Cloud Messaging (FCM)**, including **token lifecycle management**, backend API integration, and a dedicated in-app notifications UI.
 - **Designed** and integrated **REST APIs** and backend features.
- **Mobile Application Developer [Internship] - XeA Innovations** *Feb 2025 – Apr 2025*
 - Built applications using **Kotlin**, **Jetpack Compose**, and **MVVM**, integrating **real-time systems** such as location tracking.
 - Implemented **REST APIs** with **Express.js**, focusing on secure and structured communication using **Retrofit**.
- **Android Developer [Internship] - BlinkFind** *Sept 2024 – Dec 2024*
 - Implemented **OTP-based authentication** using **Firebase Authentication**.
 - Optimized performance by **30%** using **Dependency Injection (Hilt)**.

Projects

- **Abhaya - Secure Emergency Response System (Kotlin, Firebase, Accessibility Services)** [GitHub](#) 
 - Designed a **real-time secure alert system** ensuring reliability even when the application is inactive.
 - Implemented **event-driven communication pipelines** for emergency notifications using background services.
 - Integrated **Firebase Cloud Messaging** for low-latency, reliable alert delivery to multiple endpoints.
- **BetterMux - Distributed Storage System (Android, MongoDB, Retrofit, Node.js)** [GitHub](#) 
 - Developed a **lightweight cloud-like storage system**, conceptually similar to services like EC2.
 - Built a **Unix-like command interface** for interacting with remote storage (**ls**, **cd**, **cat**).
 - Designed a **client-server architecture** to handle secure file operations and structured data access.
 - Explored concepts of **remote storage abstraction, system design, and distributed communication**.
- **Transport Tracker System (Node.js, APIs, N8N, ESP32, Neo-6M)** [GitHub](#) 
 - Built a **real-time tracking system** using **ESP32** and **NEO-6M** GPS module for continuous location acquisition.
 - Implemented periodic **data polling and transmission pipeline** sending location data to backend every 30 seconds.
 - Designed a **hardware-to-server communication system** ensuring reliable data flow using **REST APIs**.

Technical Skills

Programming Languages:	Kotlin, Java, Python, C, C++, JavaScript, TypeScript
Core Concepts:	Data Structures & Algorithms, Operating Systems, Computer Networks
Security & Systems:	Authentication Systems, API Security, CTF Problem Solving, Linux
Tools:	Android Studio, Git, GitHub, Firebase, MongoDB, Postman

Education

2023 - 2027	Bachelor of Engineering (Computer Science - Data Science) Dayananda Sagar College of Engineering, Bengaluru (8.42 CGPA)
2023	Class 12 - Satyam International School (85.60%)
2021	Class 10 - Don Bosco Academy (90.50%)

Achievements and Certifications

- **NPTEL Elite+Top 5%, Fundamentals of Object Oriented Programming (IIT Roorkee):** [Link](#) 
Secured a score of **90%** and ranked among the **Top 5% of candidates nationwide**, demonstrating strong understanding of **object-oriented programming principles and Java fundamentals**.
- **Top 7 National Finalist (Team Leader), Smart India Hackathon-2025:** [Link](#) 
Shortlisted among the **Top 7 teams at the national level**, as the **team leader** and contributing to a robust **AI-powered IOT+Android based Bus Tracker solution**.
- **Winner, CTF-DSCE (Phoenix-2024):** [Link](#) 
Secured the **first position** by showcasing strong problem-solving and cybersecurity skills in the **Capture the Flag (CTF)** competition.
- **First Runner-Up, BMC-2024:** [Link](#) 
Lead a team in presenting a **product and its business model to address the language barriers** faced by travelers **using IoT and Android**.
- **First Runner-Up, Ideathon-2023:** [Link](#) 
Supervised a team of four to pitch a **business idea promoting electric vehicles and public transport for an environmentally friendly environment**.
- **Second Runner-Up, Lovable Vibe Hacks Hackathon-2025:** [Link](#) 
Achieved third place by building an **innovative solution** under time constraints, showcasing teamwork, creativity, and technical skills.
